

The Perfect Pandas

November Newsletter FS-2 Term 1

In November we were busy adding numbers in Math and skip counting by 2s, 5s and 10s. Recognising 3D shapes around us and experimenting with weights was a very interesting topic in Math. We learned some new vocabulary through fun activities such as naming where the objects are placed in the classroom using the positional language: above, below, in, out, between etc.

We celebrated the UAE National Day and the Winter Fair which was full of games and activities that we all enjoyed.

We are all looking forward to December to do some more addition and to find out what subtraction is.

Theme of the Month

This month we have talked about changes in materials, we learned what objects are made of plastic, metal, wood and fabric and we looked for these objects around the classroom. We have also tried some fun experiments: recognizing objects that would sink or float, freezing and melting objects that made us all curious to find out what happens to the objects the next day!

We are also very busy learning the letters' sounds and learning new sounds every week and trying our best to read words.

Warm Hugs,
Miss Kathy and Miss Juliet
